PORTFOLIO

SUMMARY

A proactive software engineering student with expertise in Al, machine learning, RAG and data science. Experienced in developing scalable applications with the Flask, and Streamlit, focusing on creating innovative solutions like chatbots and recommendation systems.

Passionate about leveraging cutting-edge technologies to drive impactful software projects.

WORK EXPERIENCE

JUNE 2024 - AUGUST 2024

AI INTERN DEVVIBE

• During my internship at DevVibe, I had the opportunity to immerse myself in cutting-edge technologies, particularly focusing on Large Language Models (LLMs) and cloud computing tools. I was exposed to practical applications of machine learning, AI model fine-tuning, and cloud infrastructure, while learning how to leverage opensource technologies for real-world business solutions.

DEC 2023 - PRESENT

FIVEER FREELANCE

 As a freelancer and self-employed professional, I provide specialized services in the fields of chatbot development and data visualization. I work closely with clients across different industries to help them harness the power of AI and data analytics to solve challenges, improve customer engagement, and make informed decisions based on insights derived from their data.

EDUCATION

2022 - PRESENT

UNIVERSITY OF ENGINEERING AND TECHNOLOGY, TAXILA

Focusing on Object-Oriented Programming (OOP), Database Management, and Data Structures & Algorithms (DSA), with handson experience in software development and systems design.

- · Bachelor of Software Engineering
- CGPA: 3.41

SKILLS

- DATA SCIENCE
- MACHINE LEARNING
- DEEP LEARNING
- GENERATIVE AI
- NLP
- RAG

TECHNOLOGIES

- PYTHON
- SCIKIT-LEARN
- TENSORFLOW/KERAS
- AWS
- HUGGING FACE
- LANGCHAIN
- FLASK
- STRFAMLIT
